

HOMEWORK

Estimate using rounding. Then find the sum.

1.
$$\begin{array}{r} 10.01 \\ + 6.5 \\ \hline \end{array}$$

2.
$$\begin{array}{r} 12.08 \\ + 0.6 \\ \hline \end{array}$$

3. $0.03 + 7.266$

4. $9.59 + 7.63$

5. $0.3104 + 0.24 + 0.437$

6.
$$\begin{array}{r} 9.7 \\ + 2.12 \\ \hline \end{array}$$

7.
$$\begin{array}{r} 3.55080383 \\ 6.36940144 \\ + 9.4567438 \\ \hline \end{array}$$

8.
$$\begin{array}{r} 61.328854 \\ 479.05795 \\ + 92.28214 \\ \hline \end{array}$$

Problem Solving

9. The school store earned \$625.32 one week, and then \$98.36, \$145.98, and \$304.09 during the next three weeks. How much did the school store earn in the four weeks?
10. Lin drove 187.6 mi from New York City to Baltimore and then 38.3 mi from Baltimore to Washington, D.C. What is the total distance she drove?

Write About It

11. You can solve most math problems more than one way. Inez and Priya add 0.77 and 0.33 with base ten blocks. Explain why both are correct.
