

Divide. Write zeros as placeholders in the dividend as needed.

1.  $0.5 \overline{)0.8}$

2.  $0.5 \overline{)10}$

3.  $0.025 \overline{)0.06}$

4.  $0.008 \overline{)0.01}$

5.  $0.05 \overline{)0.9}$

6.  $0.24 \overline{)0.3}$

7.  $0.08 \overline{)0.3}$

8.  $0.09 \overline{)18}$

Divide. Write zeros in the quotient as needed.

9.  $7 \overline{)0.035}$

10.  $9 \overline{)0.414}$

11.  $0.2 \overline{)0.1802}$

12.  $9 \overline{)0.099}$

13.  $0.4 \overline{)0.016}$

14.  $4 \overline{)1.208}$

15.  $3.4 \overline{)0.017}$

16.  $5 \overline{)1.505}$

**Problem Solving**

17. Kylie runs 1.68 km in 12 minutes. If she runs the same distance each minute, how many kilometers does she run in one minute?

---

18. A bag of trail mix costs \$1.25. How many bags can Jacques buy with \$5?

---

**Write About It**

19. How does multiplication help you check your work in a division problem?

---
