Name: _____ **Class:** _____ **Date:** _____

8th Grade Pre-Algebra Section 6.5 Part 3 Worksheet

1. Peter is purchasing a new LED television for his home. He finds a 20% discount at Best Buy on a $625 tv. The store has a 5% sales tax. How much is Peter's final purchase?

2. Brian purchases a new cell phone that originally costs $320. He receives a 12% student discount and must pay a 6% sales tax. What is his final price?

3. Linda is shopping for a prom dress. She finds one she likes for $244 and it is on sale for 30% off. If the sales tax is 7%, what is the final price of the dress?
